

Everything you
need for location
lighting in one
compact case!

LOWEL-LIGHT uni-6

Lowel-Light's tradition of compact, versatile lighting equipment is carried forward in the wonderful, new LOWEL-LIGHT UNI-6. The vulcanized fibre case, only 14½" x 22½" x 6½", holds enough lighting gear to handle most location jobs. The UNI-6 is always ready to travel — always ready to set up. The six Lowel-Lights are clamped in seconds to stands, furniture, pipes; attached to walls with Gaffer-Tape or mounted in countless other ways. The six Barndoors slip on the bulbs instantly, without tools. Special apertures and foam padding hold six R 40 type reflector bulbs. Two aluminum stands, engineered by P.I.C. for rugged, professional use, each have five locked-in sections that extend to 9 feet. There is space for more stands if needed. The three, 25 foot, neoprene insulated extension cords are U.L. approved for 15 amps.; each has unbreakable, 3-way (cube tap) outlets. You'll always travel well equipped with the new LOWEL-LIGHT UNI-6.

SIZE: 14½" x 22½" x 6½"

WEIGHT: under 22 pounds

MATERIAL: vulcanized fibre, steel edges and corners

CONTENTS: 6 Lowel-Light tape-up, clamp-on lighting units
6 Lowel-Light Barndoors for R 40 reflector bulbs
6 partitions for R 40 bulbs (bulbs not included)
2 9 ft. aluminum stands, 5 locked-in sections
3 25 ft., 15 amp. neoprene extensions, cube taps
1 12 yard roll of Lowel-Light Gaffer-Tape
2 25 amp. fuses for emergencies

PRICES:

#U6623	Lowel-Light Uni-6 (less bulbs)	\$143 00
#U2	9' stand	21.50
#U3	25' extension cord	5.00
#U6	fibre case only	27.50

LIGHT YEARS AHEAD

SAVE TIME AND SPACE

with a unique, photographic lighting
system that lets you mount lights
virtually anywhere, even on walls
and windows, in the time it takes to
count 3, 2, 1, 0 — the apogee of
space age design, the incredibly
compact, efficient and versatile

5 LIGHT KIT WITH 5 BARNDORS

LOWEL LIGHT

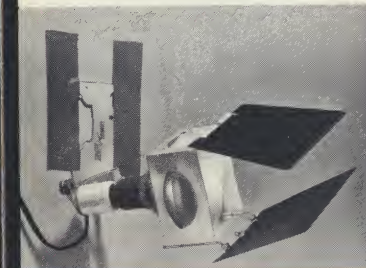

The Lowel-Light system is fine in the studio, but you'll never know its real potential until you take a Kit on location. You'll use Gaffer-Tape instead of booms and overhead rigging; you'll tape or clamp the lights precisely where you need them; you'll have more floor space and complete freedom for reverse angles; you'll snap on the Barndoors without tools and without first removing hot bulbs; you'll be delighted by the time, work and space saved.

TIME Both the Lowel-Light and Barndoor are designed for instant-mounting. The system is guaranteed to save enough set-up time to pay for itself in one day of location shooting!

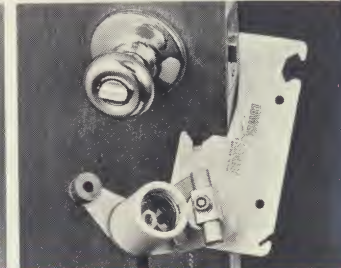

SPACE You travel light with Lowel-Light — world's most compact lighting system. Five lights, five Barndoors and 3 large rolls of Gaffer-Tape can be carried in a case only 9"x12"x4". One light and one Barndoor fit in a jacket pocket.

"UNIVERSE-ATILITY"

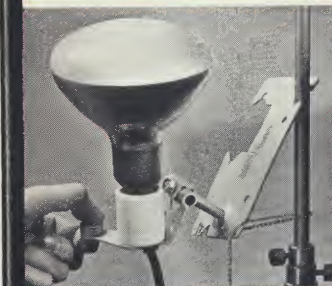

A word we coined to describe the remarkable ease with which Lowel-Lights can be mounted virtually anywhere, making "impossible" set-ups simple.

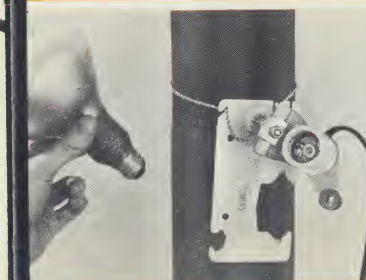

Lowel-Lights are mounted quickly and securely to wood, glass, metal, brick, tile and painted walls with strips of Gaffer-Tape. Barndoors snap on instantly.

Unique notches clamp onto doors, partitions, venetian blinds, knobs, overhead fixtures, etc. Holes allow mounting with nails, screws or bolts.

New notch-chain-slot invention locks Lowel-Lights on stands, pipes, furniture and tripod legs up to 1 3/4". It takes only a second to clamp unit on any part of a horizontal or vertical pipe. Time-and-finger-saving "cool" handle is used to adjust universal swivel.

Chain-and-slot provide rapid vertical mounting on large pipes and posts.

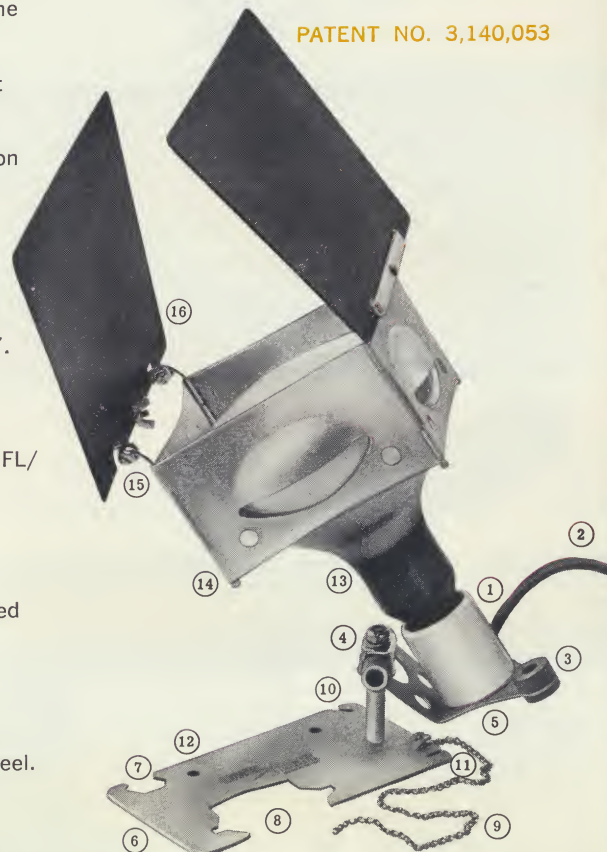

Notch clamps on desks and shelves; plate wedges between

- 1 U.L. approved porcelain socket has special spring loaded center tab guaranteed to make contact with the bulb even after years of use.
- 2 Neoprene insulated cord, U.L. approved for high temperature use.
- 3 Neoprene "handle" remains sufficiently cool to permit directional adjustments.
- 4 Universal swivel provides complete directional control with constant tension. Tension adjusting nut is always accessible.
- 5 Socket-swivel bracket designed to counterbalance bulb weight so that minimum tension is necessary.
- 6 Aluminum alloy base-plate with non-marring felt backing.
- 7 Notch for clamping to thin shelves, and with chain 9 and slot 10 clamping to stands, pipes, etc. up to 1/2".
- 8 Notch for clamping to doors, partitions, thick shelves, and with chain 9 and slot 11 clamping to pipes, stands, etc. up to 1 3/4".
- 12 1/4" holes for mounting with nails, screws, bolts.
- 13 Any G.E., Westinghouse, Sylvania, or other R 40 reflector bulb. Partial list: 150/FL&SP, 200/FL&SP, 300/FL&SP, 375/32K&34K, 500/RSP, 500/RFL/32&34K.
- 14 Flexible aluminum alloy bulb mount fits directly on all R 40 bulbs, without tools; rotates 360°; bright finish dissipates heat, extends bulb life; can be used with other clamp-on lights.
- 15 Spring loaded hinges maintain smooth, constant, but easily adjusted tension. Offset design allows flaps to swing all the way back, 270°, so that bottom flaps on back lights will be out of the picture on wide angle shots.
- 16 Large 5"x10" door flaps are instantly removable.

Black anodized finish will not chip or peel.

- 17 Barndoor folds up flat, fits in a jacket pocket, weighs 4 1/2 ounces.
